date on the Product Details. It was supposed to be yesterday but it is actually today. But nevertheless, I have the Demo version
of Cinema 4D and I really need the full version and I have been looking for a while and cant find any activation codes. Can
anyone help? Best Regards, rkeller 07-09-2009, 01:21 AM Hi rkeller, I don't believe that you can get a code for the full version
of Cinema 4D after you have the demo version. If you want the code to unlock the full version, you should purchase it from the
website. Martin 07-09-2009, 04:10 AM Hello, I just have a question. I am very interested in the full version but I haven't found
the activation code on the website. Can I get a code for the full version via the support or am I out of luck? Thanks jessif23
